

Bug Report:

Issue 1:

Title: [Hotel] "Something went wrong" shown for whitespace-only input in Hotel Search

Description: When a user enters only whitespace characters in the hotel search input field on the hotel search page a generic error message "Something went wrong Try again" is shown instead of a proper error message.

Steps to Reproduce:

- Navigate to the **Hotel Search** page
- Enter only spaces (e.g., " ") in the search hotel input field

Expected: A proper error message should be displayed: "Enter valid hotel or city name"

Observed: "Something went wrong Try again" error message displayed

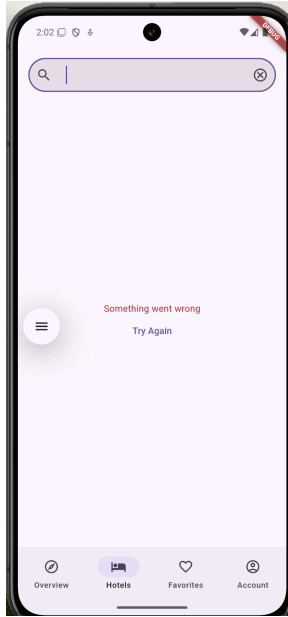

Priority: Medium

Environment: Dev

Platform: Android, iOS

Device: emulator
